

WILLIAM GUNN HOUSE, HAMPSTEAD

■ Green Roof Residential Development

Client : United House Limited
Contractor : J Ring Roofing
Completed: October 2009

Size: 910m²
System Used: Langley Extensive Green Roofing System

William Gunn House

William Gunn House is a new build residential block in the heart of Hampstead, London. The project for United House was designed by Calford Seaden Architects who specified the Langley Extensive Green Roof system over the 910m² roof area, on three different roof levels.

Langley also helped with the design and supplied the roof system on the sister project Stonegrove Estate, also featured as a case study.

Approved contractor J Ring Roofing did an excellent job of installing the flat roof system as seen in the highlighted photographs.

Main System Products:

Graviflex
Adepar JS
Tapered Parafoam Ultra Insulation
Parevapo SBS
Fabric Filter Sheet
Nutrifoam Vegetation Mat
Pre-Cultivated Sedum Mats
